Date :2011-4-1. With reading problems in the proportion of various types of examinations gradually increased. its importance has become increasingly prominent. However. most currently available guidance books. seriously out of the current teaching of reading practice. reading something in the intensive training. the focus often is neither teaching nor in the examination of test points. In view of this book is a bold breakthrough in slashing tedious. Teaching of reading in accordance with the outline of the test points. extra curricular knowledge points move. carefully designed set of exercises. Specifically. the set of books has the following characteristics: First. the synchronous interface. the theme selected by the text content. or reading materials. Existing language teaching materials. text within each cell are intrinsically linked. Some units are the same selection. and some units are subject similar. We choose the time of reading materials. but also try to take into account these two points. with the simultaneous convergence of materials. both to consolidate the knowledge they migrate to extra-curricular classroom to enrich students'...
