Sensations lead to movement. A child sees an object and at once desires to approach or take it. By seeing, hearing, tasting, touching, and moving, the child's brain grows slowly in the power to think and reason. Reasoning power, however, comes later than that of observation. Sense knowledge is gained by the mind of the child coming in contact with objects directly and not through the medium of another mind. Spencer says in his Education, A child's restless observation, instead of being ignored or checked, should be diligently administered to, and made as accurate and complete as possible. Sally says, First-hand knowledge of things through personal inspection is worth far more than any second-hand account of them by description. In the report of the Committee of Ten are found these words: - Observation should go before all other forms of geographical study and prepare the way for them; its object being (1) to develop the...
