But it is almost certain that the delivered antenna and the transmitted state of polarization will be imperfect, and will therefore advantageously demonstrate a slightly modified ellipticity. As part of the radar calibration, it will be necessary to measure the actual transmitted polarization state (i. e. , its ellipticity) and the antennas polarization cross-talk, and use those values to optimize the decision points in the icing algorithm. 2. 2 Dual-Channel Radiometer GRIDS primary function is the detection of the presence of liquid water (LW) in quantities above a meaningful threshold, and in drop sizes of 50 - 500 microns and smaller. For GRIDS, the radar is the primary observing instrument for determining cloud particle type and identifying clouds of droplets, but it alone cannot make all necessary observations. Also required is a means to remotely sense the quantity of liquid water in the...
