Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Endogenous Modeling of Late Entry Penalties for Packaged Goods This paper extends previous single equation analysis by the authors(1992) which found significant innate order of entry penalties that were modified by promotion, price, distribution and advertising levels. In this paper endogenous effects of order of entry on the marketing variables and the decision to enter early itself are captured in a recursive structural equation model of market share. The statistical analysis of this extended model finds significant relationships between order of entry and the level of marketing variables. In addition, significance is found in the correlation between entry order and the expected market share of the new product and the rate of growth of earnings per share, but not the size of the firm. Surprisingly, the endogenous effects increase rather than decrease the size of the innate market share penalty for late entry relative to the value estimated in the original single equation model. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
